

THE STAIR-STEP

A FIELD REFERENCE

BECOMES

20,736

Every tier of the incarnational ladder divides
by twelve. Five tiers. One arithmetic.
This page documents all of it.

KEYLONTIC MORPHOGENETIC SCIENCE
TREATED AS MECHANICS, NOT MYSTICISM

THE LADDER

ONE RISHI TO 20,736 PHYSICAL SELVES

DIMENSION	IDENTITY	ENTITIES AT TIER	POWER
D13-15	RISHI x 12	1	12^0
D10-12	AVATAR x 12	12	12^1
D7-9	OVERSOUL x 12	144	12^2
D4-6	SOUL x 12	1,728	12^3
D1-3	INCARNATE	20,736	12^4

EACH STEP DOWN COSTS A FACTOR OF TWELVE.

THE COUNT IS NOT A METAPHOR. IT IS ARITHMETIC.

$$1 \times 12 \times 12 \times 12 \times 12 = 20,736$$

ONE ENTITY AT THE TOP. TWENTY THOUSAND SEVEN HUNDRED AND THIRTY-SIX AT THE BOTTOM. THE TIERS BETWEEN ARE FIXED.

WHAT EACH TIER IS

RISHI

D13-15

The first differentiation out of undifferentiated source.
One unit. It does not incarnate and it does not divide again
above itself. Everything below is a projection of this.

AVATAR

D10-12

Twelve. The first division. Each Avatar holds a full copy of
the Rishi's pattern and administers one twelfth of its field.
Still non-physical.

OVERSOUL

D7-9

144. The tier most traditions call the higher self. Each
Oversoul coordinates twelve Souls and carries the memory
the incarnate levels cannot hold at their bandwidth.

SOUL

D4-6

1,728. The tier that experiences. Each Soul projects twelve
simultaneous physical selves and integrates what all twelve
encounter. Not sequential lives. Concurrent ones.

INCARNATE

D1-3

20,736. Physical, embodied, time-bound, and running on
restricted bandwidth. You are one of these. The other
20,735 are running right now, not before or after you.

WHY TWELVE

Base ten is anatomical – the number of fingers on a human body, and nothing else recommends it. Base seven is planetary: it tracks a lunar quarter, and it is where the seven-chakra model comes from.

Base twelve is structural. It is the smallest number with four proper divisors – 2, 3, 4 and 6 – so it can be halved, thirded, quartered and sixthed without remainder. Ten cannot. Seven cannot at all.

The claim in Keylontic mechanics is narrow: the ladder divides by twelve because twelve is the smallest base that survives repeated division intact. Everything else here follows from that property.

ON AMNESIA

A D1-3 self cannot hold D7-9 memory for the same reason a narrow channel cannot carry a wide signal. The information is not deleted. It is compressed to fit the bandwidth available.

Amnesia is not punishment. It is compression.
And all compression is reversible.

ATtribution

Documents a specific published system – Keylontic Science / the Freedom Teachings, Ashayana Deane. Presented as documentation of that system's mechanics, not as established physics.
